22/23

THE 2022/23 GEAR

Our 22/23 collection is built with innovation and authenticity at its core. Each model has been developed for life, for living in the moment, for full throttle adventures and all the weather nature can throw at you. For the rider who finds solace in being ready for anything and is driven by a passion for speed and the great outdoors. This line validates our mission.

A dark, atmospheric photograph of a snowmobile rider in mid-air, jumping over a snowy ridge. The rider is silhouetted against a lighter sky. The background is a dense forest of tall, snow-laden evergreen trees. The overall tone is moody and winter-themed.

ATHLETES

The 509 team is comprised of dozens of the industry's best riders. From freeriders to hillclimbers to race teams and freestylers, many of the best choose 509 as their preferred snowmobile gear company.

OUTERWEAR

AN ESTABLISHED LEADER

5TECH™ outerwear has better wearability and waterproofness by combining industry leading technologies. 5TECH™ stretch materials utilize mechanical stretch yarn on the durable face in combination with a laminated 10k/10k waterproof breathable component.

AN EVOLVED APPROACH

5TECH™ PRO is the pinnacle of 509's commitment to outerwear performance. Stack the 4-way stretch woven face material (rated at 20k/20k waterproof and water vapor transfer rate) with the additional weatherproofing and durability of Fusion Welding construction.

LEADING THE PACK

Sympatex® is 45K/25K waterproof breathable material with a 200D face that balances a lightweight feel with trusted durability.

TERRAIN METER

Mountains or trails, insulated or non-insulated, wet or dry, or somewhere in between, your product should meet the needs of the style of riding you like to do.

FLOW METER

Whether you burn it fast on frigid trails or navigate between tight trees, the 509 Flow Meter will help you dial-in the correct airflow for your riding style.

FIT GUARANTEE

We guarantee our customers' 100% satisfaction. Try it on and if you don't love it, send it back and we got you covered. We promise to help remedy any issues or exchange the item for a more suitable replacement. Fueling your passion, risk free.

Overview

The ultimate adventure mono. The Ether Mono is unlike any Mono Suit you have seen from 509 in the past. Featuring a Sympatex® membrane making it windproof, waterproof, and breathable no matter where your winter adventures take you. Even in the harshest conditions, you will stay dry and moisture controlled all day - whether you're snowmobiling, snowbiking, snowboarding, or skiing the Ether Mono is the ultimate mountain adventure Mono Suit.

Features

- + Sympatex® construction with 45K/25K waterproof breathable material, 200D face for that balance of lightweight and durable.
- + Reinforced 420D 100% Nylon Nail Head at hem and inseams
- + Fully lined construction
- + YKK® waterproof zippers throughout
- + 5Ride protection zone in seat for improved comfort, and less condensation
- + Full leg zips for easy on and off, even with boots on.
- + Built in Knee protection - protects knees, and fabric against impact cuts
- + Hand warmer, chest, and internal pockets for essentials
- + Internal adjustable harness
- + Pit zips and thigh vents for additional venting needed to get unstuck or building jumps
- + Removable hood
- + Arm pocket with goggle sham for a quick goggle clean

Overview

When mountain riding is your playground, you are out there to thrive, not just survive. The Stoke Mono Suit is built to help you thrive in the mountains. With the same 5TECH™ Pro stretch waterproof and breathable materials as the Stoke Jacket and Stoke Bib, this durable face 20k/20k fabric doesn't restrict your movement, stretches when it absorbs impacts, and then recovers. Featuring 3-layer construction for a lightweight feel, no extra bulk, and an inner tricot layer that limits condensation. Built with a more athletic cut that doesn't restrict, alpine access pockets, specifically designed for you to wear your avy pack. The Stoke Mono Suit is built for you to comfortably ride in the wide range of conditions of mountain riding.

Features

- + 5TECH™ Pro 3 layer stretch material - 20K/20K waterproof breathable. Windproof. Durable face fabric with stretch absorbs impact and recovers, reducing tearing and ripping.
- + Fusion Welded Seams are flatter, dryer, and less bulk than normal sewn and seam-taped seams
- + Smooth running main zipper is waterproof YKK® coil zipper, with additional zippered gusset at the collar for extra room in the collar
- + Reinforced durability zones using 600 D Polyester reinforcement
- + 5Ride protection zone in seat for improved comfort, and less condensation
- + Built in knee pads protects knee, and helps to protect garment from impact punctures, removable
- + Cuff with innovative Speed Cinch closures, and wrist gaiters for final seal
- + 3/4 leg zips and boot gaiters for easy on and off, before or after you put your boots on
- + Pit zips, and thigh venting for adaptable venting
- + Internal Stoke Harness for control and comfort
- + Internal pocketing for phone and essentials
- + Permanent alpine hood

Terrain & Flow Meter

Overview

The best just got better. From athlete feedback and field tester's input, we improved this jacket and bib combo with an improved 5TECH™ Pro stretch material. Alpine-proven materials with 20k/20k performance, now with a stretch woven construction. The stretch woven has 3% stretch, which provides a bit of ease, improves fit, comfort, and reduces seam stress. Built with our new 3 layer construction, we removed the taffeta lining for optimal fit and finish. Other improvements in the pocket layout for the alpine environment, and use with an avy pack.

Features

- + Industry awakening Fusion welding provides unparalleled seam strength, and waterproof construction on critical seams and construction points
- + 5TECH™ Pro stretch woven material
- + YKK® Aquaguard zippers
- + Alpine hood, wrist gaiters, and snow skirt
- + Pit zip venting
- + Stoke connect snaps together with bib for added protection or run it like a normal jacket and bib

NIKWAX® RECOMMENDED DWR MAINTENANCE TREATMENT FOR OPTIMAL WATER REPELLENCY ON 509 PRODUCTS

NIKWAX TX DIRECT WASH IN- 10 OZ

F13002300-000-001 / \$13.95

Nikwax TX Direct Wash-In treatment restores durable water repellency (DWR) for waterproof/breathable fabrics such as Gore-Tex, HyVent, PreCip, and Event. Washing and using fabrics can make them begin to absorb water or “wet out”. Nikwax TX-Direct completely restores surface water-repellency which enhances breathability. Nikwax TX-Direct lasts several washings and does not need to be reapplied after every wash like other treatments.

- + A wash-in treatment that revives your gear's DWR performance
- + Adds water repellency and renews the fabrics breathability
- + Ten fluid ounces will treat up to three clean garments

NIKWAX TECH WASH - 10 OZ

F13002200-000-001 / \$9.95

- + Safely cleans technical synthetic outerwear without damaging DWR like normal household detergents
- + Enhances performance of Nikwax waterproofing treatments; for use before TX. Direct, cotton proof, Polar proof, or softshell proof
- + Easy wash-in application; machine wash safe
- + Water based, biodegradable, and contains no PFCs, VOCs, optical brighteners, or added scent

| 27

NIKWAX TX DIRECT SPRAY ON - 10 OZ

F13002400-000-001 / \$14.95

Nikwax TX Direct® Spray-On is easy and quick to apply, and its highly Durable Water Repellency (DWR) develops on air drying. The need for tumble drying is removed, this saves energy and protects more vulnerable, older, garments from heat. Nikwax TX.Direct® Spray-On has been specifically designed and optimized for breathable waterproof garments; it leaves a flexible water repellent treatment on individual fibres allowing moisture vapour to pass through, maintaining breathability. The spray-on application allows for direct treatment of areas which require it most (e.g. elbows and seams on jackets) and will not compromise the properties of internal wicking liners.

- + Rejuvenates the water repellency of tired, worn clothing
- + Overcomes the problems of gear 'wetting-out'
- + Maintains breathability
- + Prolongs the life of gear and optimises performance in wet weather
- + Easy to apply

STOKE_{ZI}**STOKE ZI JACKET**

Specifications

- + Material: 5TECH™ Pro
- + Style: Shell
- + Insulation: Zonal
Insulation baffled blown
in Syn Down insulation
- + Riding: Backcountry/Trail

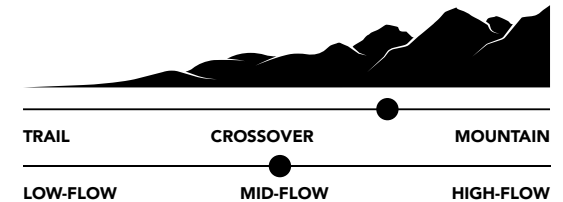

Overview

The Stoke ZI provides the legendary fit and comfort from the 5TECH™ Pro 3 layer stretch material, and adds some colder range with Zonal Insulation panels in Core. The ZI components provide additional insulation, which creates air space and insulation for colder temperatures, or those who run colder. Alpine-proven materials with 20k/20k performance, now with a stretch woven construction. The stretch woven has 3% stretch, which provides a bit of ease, improves fit, comfort, and reduces seam stress. Built with our new 3 layer construction, we removed the taffeta lining for optimal fit and finish. Other improvements in the pocket layout for the alpine environment, and use with an avy pack.

Applied Technologies

Terrain & Flow Meter: SHELL

Terrain & Flow Meter: INSULATED

Overview

Re-designed to improve comfort and style, and increased durability the Allied Mono Suit Shell is built for the biggest and deepest snowmobile adventures. Aggressively styled and technology packed, this is a must have if you seek the ultimate in protection and mobility. Hybrid construction featuring 5TECH™ Shell fabric that is combined with 5Tech Stretch Shell fabric in the seat and across the shoulders for a noticeable, and welcomed stretch and improvement of fit. The Allied Mono is built with a relaxed fit so that you can get as rowdy as you want. The one-piece design, while obviously super fashionable, also eliminates the gaps that exists in a traditional two-piece getup, meaning you won't have to worry about snow or drafts distracting you while you're sending it. The Allied Mono Suit uses our established 5TECH™ material, a Cordura® HP 300D face and 10k/10k membrane. Boasting three sets of vents—inseam, outseam, and underarm—to let you feel the breeze when you're hucking or digging out. With more pockets than you have things to put in them—internal, chest, thigh, and hand—as well as an updated helmet-compatible hood. Burly Cordura® instep and lower-leg reinforcements fight off sharp running board attacks.

Features

- + Triple-stitched, hybrid construction featuring 5TECH™ material with 5Tech Stretch panels in the seat and across the shoulders. Cordura® HP 300D polyester face, and 10k/10k membrane
- + Waterproof Main zipper for easy in and out
- + Internal suspenders for easier in and out and keep things in place
- + Gusseted crotch for improved fit, lower stress on the seams. Triple stitched for increased seam strength
- + DWR coating for industry leading Water Repelling fabric surface
- + Asymmetric cuffs and wrist gaiter
- + Hand, chest, internal and thigh pockets
- + Arm pit, side vent, and thigh ventilation system
- + Water proof coil zippers throughout
- + Removable hood
- + 600D reinforcements
- + Leg zips for easy on and off
- + Internal boot gaiters
- + Insulated models come with 100 gram Thinsulate™ insulation

- + Riding: Backcountry

Applied Technologies

Terrain & Flow Meter

Overview

The Evolve Jacket improved with a hybrid construction that blends a 5TECH™ waterproof breathable material, with a water proof breathable stretch woven material. We have optimized the construction for more breathability, yet still durable for all mountain riders. Entering the jacket is an experience that describes all of the features it has. As you slip the jacket on, sliding the arms in through the FLOW lining with low friction liner, and extend through the wrist gaiter for a next-to-skin seal. The sleeves are anatomically fit with 5TECH™ stretch zones. Open the velcro cuff, and the speed cinch adjusts the cuff to proper fit, close the Velcro tab to lock in place. As you zip the jacket up and seal off the cold and biting wind blasts of powder, something magical happens. 5MAG pocket creates easy access. 5MAG closure focuses Gaussian energy, reducing interference with other components. The 5MAG pocket is aligned with the center of your body, natural, easy to find, and easy to access. The flow lining is easy fitting, layer friendly, and breathable. Stretching and conforming, it has high air flow, low weight and bulk, and less surface area for condensation and absorption. 5TECH™ stretch materials use a mechanical stretch yarn on the durable face and laminated with a 5TECH™ waterproof breathable component. The material stretch now provides great range of motion and comfort in our hybrid construction. High strength 5TECH™ materials with a Cordura® face, 300D high tenacity yarns, and a C6 Durable Water Repellency. It can shed snow and rain and take a hit.

Features

- + Removeable hood
- + Pit zips for flow
- + Snow skirt
- + Tether attachment at lower hem
- + Hand pockets for organization, and cold weather comfort
- + Internal essentials pocket
- + Hem cinch for adjusting fit
- + Available in XS to 3X, 7 sizes
- + Graphics and colors that inspire your passion
- + Warrantied for 3 years
- + Seam taped
- + Powerstretch panels for improved moisture management
- + Features that predict your movement, understand how to adapt
- + Hybrid construction with stretch zones, and durability zones
- + Improved waterproof coil zipper, and waterproof zipper construction throughout
- + Internal organizer pocket for 12 Volt Ignite powerpack

EVOLVE**EVOLVE BIB SHELL**

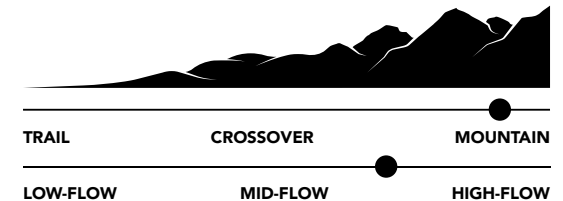

Specifications

- + Material: 5TECH™
- + Style: Shell
- + Insulation: Non-Insulated
- + Riding: Backcountry

Applied Technologies

Terrain & Flow Meter

Overview

The new evolve bib is built for a broad range of snowmobiling on long trail rides, as well as off-trail demands. The Evolve bib pairs up perfectly with our Evolve jacket. Two products designed to fit and function as one. The Evolve bib features a mid-rise front and rear bib for snow blocking comfort. Featuring fully seam sealed 5TECH™ fabric, the Evolve is the ultimate in weatherproof & wearability. Its shell construction works perfectly with your 509 base layers for ultimate versatility.

Features

- + 5TECH™ 10k Waterproof and 10k breathable materials, fully seamtaped
- + Waterproof 5TECH™ materials with 300 D Cordura® polyester, bartacked, and seamtaped, 2-layer construction
- + Fully lined, with easy to slide on and off, protects the inner waterproof breathable membrane, and helps to keep you dry
- + Mid-Rise bib height with stretch panels at sides, for improved fit and less bulk
- + 5Ride protection zone in seat insulates you from the outer layer of materials. Prevents condensation, and resists melting on outer layer of garment
- + ¾ leg side zips for easy on and off, with or without boots on
- + Knee pads built into 600d poly durability zone, for increased comfort, and protection from cold and impact with the machine
- + Improved waterproof coil zippers for waterproof and windproof construction
- + All reinforced, seam taped, and built tough
- + Tether attachment at waist
- + Available in 7 sizes, and short sizes, generously tailored for layering and room to grow
- + Warrantied for 3 years

Terrain & Flow Meter: IGNITE

Overview

Even the coldest days on the trail are no match for the heated R-200 ignite jacket. Built to fit/zip perfectly into the 509 R-200 Jacket and powered by your machine or a 509 12-Volt Power Pack (sold separately). Utilizing carbon heating elements, this heated technology is low profile, low bulk, and excellent at holding a perfect temperature to keep you warm, but not overheat. Use your 3-mode button to switch between low, medium, and high heat depending on your needs.

Features

- + Ignite heating elements use low profile, low bulk carbon elements are excellent at passive heating
- + 3 button mode - low, medium, high settings
- + Connect to 12V power from machine using SAE 12-Volt connector

RANGE INSULATED JACKET

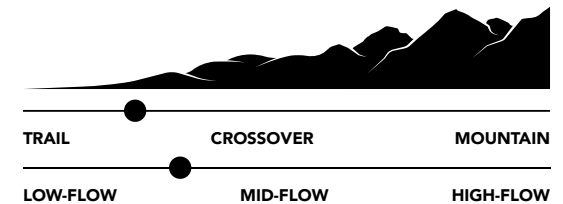

Specifications

- + Material: 5TECH™ Hybrid
- + Style: Insulated
- + Insulation: Thinsulate™
200g : 150g Arms
- + Riding: Trail / Crossover

Applied Technologies

Terrain & Flow Meter

Overview

The range jacket uses 5TECH™ Hybrid construction of 5TECH™ 10K/10K durable CORDURA® & 5TECH™ stretch woven material. The entire jacket is 10K/10K waterproof and breathable and features 150 grams in arms, and 200 grams on body of Thinsulate™ insulation for low bulk and added warmth for added protection from cold and prolonged exposure. Built to perfectly combine with the Range Bib.

Features

- + 5TECH™ waterproof breathable materials, 300D CORDURA® face, bartacked, and seamtaped construction
- + 5MAG chest pocket integrated to the zipper flap, with goggle sham and internal pockets
- + Hand warmer pockets are bellowed for more room at the cradle of the pocket, lined with warm brushed tricot
- + SPEED CINCH, with wrist gaiters for final next to skin seal
- + A soft fleece yoke provides warm and inviting zone around neck and shoulders. It prevents snow from melting on your shoulders, and it prevents internal condensation from a cold outside layer.
- + Improved water proof zipper
- + Full pit zips with dual zippers
- + Tether attachment.
- + Reflective piping
- + Snow skirt keeps snow and cold drafts out
- + Internal pockets, left and right
- + Hem cinch

STOKE_{ZI}

WOMEN'S STOKE ZI JACKET

Specifications

- + Material: 5TECH™ Pro
- + Style: Zonal Insulated Shell
- + Insulation: Zonal Insulation baffled blown in Syn Down insulation
- + Riding: Backcountry/Trail
- + Women's specific fit

Overview

The Stoke ZI provides the legendary fit and comfort from the 5Tech Pro 3 layer and stretch stretch material, and adds some colder range with Zonal Insulation panels in Core. The ZI components provide additional insulation, which creates air space and insulation for colder temperatures, or those who run colder. Alpine-proven materials with 20k/20k performance, now with a stretch woven construction. The stretch woven has 3% stretch, which provides a bit of ease, improves fit, comfort, and reduces seam stress. Built with our new 3 layer construction, we removed the taffeta lining for optimal fit and finish. Other improvements in the pocket layout for the alpine environment, and use with an avy pack.

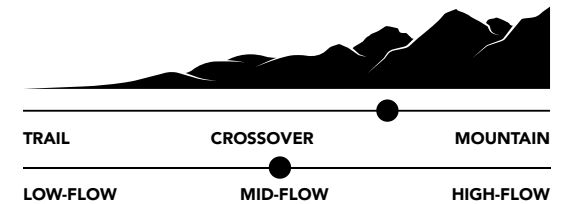

Applied Technologies

IGNITE

12 VOLT IGNITE POWER PACK

Overview

The 12 volt powerpack is built to power all of the 509 powered accessories. Store in jacket pocket, and utilize its 10,000 mAh supply for hours of use with our Fog-Free Ignite goggles, Ignite Helmets, and our Ignite Heated jacket components. 12 volt power from machine can be used to charge while riding on the machine, using a Power Gate chip that charges, and powers at the same time. Un-tethered and off the machine you will stay heated, and fog free.

Features

- + 10,000 mAh capacity using Lithium – Ion battery technology
- + Power Gate chip for powering and charging at the same time
- + Overcharging protection circuit.
- + IP57 dust and moisture proof
- + Battery level indicator
- + 12 Volt power in using a DC 5.5 connector and then a SAE DC connector for high Amp charging
- + Micro USB charging port for Home or Auto charging to make sure its fully charged for ride.
- + ABS case, with TPR overmold
- + Weight: 10.5oz
- + Dimensions: 5in x 3in x 1in

Outputs

- + 10,000 mAh capacity using Lithium – Ion battery technology
- + 12 Volt DC 5.5 - 3 amp output, great for powering Ignite Jacket
- + 12 Volt DC 5.5 - 1.5 amp output for Delta Ignite helmets, using supplied a DC to RCA adaptor
- + 7.4 Volt DC 2.5 - 1.5 amp output for Ignite goggles.
- + 5 Volt USB 2.0 Amp output to charge phones, Go-Pro®, GPS, radio accessorie

SPEEDTINCH

Conditions

Overview

For mountain riders that demand the most from their sled, they also demand the most from their gloves. Impeccable grip to the bars, without slip, and fewer layers inspires confidence. The Stoke Glove is purpose built for these riders, with a precise glove fit, articulated patterning, and strategic accordion stretch zones. Merino insulation provides warmth and manages moisture, and does without the subtle but noticeable slippery layer of membrane and batted insulation layers.

Features

- + Top grain goat leather treated with durable water repellency at palm and fingers and forchettes
- + Additional pittards oiltack laser etched palm for insane grip to the bars
- + Palm includes a catenary cut to take out bulk, and eliminates any wrinkling or bunching
- + Accordion stretch zones for premium fit, without being tight
- + Softshell laminate back
- + Merino wool terry insulation liner manages moisture and insulates while providing great grip
- + Low profile neoprene cuff with velcro closure
- + NOTE: Leather treatment like Nikwax for continued optimal water repellency

WHAT IS THE MIPS® SAFETY SYSTEM?

AND HOW IT WORKS?

Mips stands for Multi-Directional Impact Protection System. The Mips® system is designed to provide added safety for helmets. For certain impacts, the Mips® system can reduce harmful forces that might otherwise be transferred to the head.

Should you have an accident and hit your head, the Mips® system in your helmet is designed to help reduce the rotational motion of certain impacts that may otherwise be transferred to your head. Rotational motion is the most common cause for concussions and more severe brain injury in oblique hits to the head. The Mips® system consists of a low friction layer that is mounted in the helmet. In a crash, the low friction layer is designed to move slightly inside the helmet in order to help redirect forces away from the head. This is intended to help reduce the risk of brain injury.

WHAT IS THE DIFFERENCE

BETWEEN THE MIPS® SYSTEM AND OTHER SAFETY SOLUTIONS?

Every Mips® solution is intended to give an omnidirectional coverage of the whole surface between the head and helmet and enable a relative movement of 10-15mm. This, to help redirect the energy away from the head in an oblique impact. Mips®-equipped helmets are also certified to meet European and US helmet safety standards for the region that they are sold.

FIDLOCK®

Terrain & Flow Meter

Overview

The Tactical Helmet has provided more miles of protection and comfort to passionate Trail riders and mountain riders over its life than any other helmet. Trail and Mountain riders alike have come to know and trust the 509 Tactical helmet platform over the years. We convinced riders that an using an open face helmet combined with 509's premium goggles is more comfortable, offers the ultimate field of view, and is more protective than the traditional full face helmet option. Some might say that this level of perfection couldn't be improved. 509's brand new Tactical 2.0 is here to raise the bar we set and to prove that improvement is indeed possible.

Features

- + 3 Shell design, XS to 4X
- + Polycarbonate blend for stiffness and absorption
- + DOT and ECE 22.06 certification
- + Deep shell for full coverage, intermediate oval shape for excellent fit
- + Innovative Venturi Vent pulls moist air from helmet without cold wind coming into helmet On/Off shutter inside helmet
- + Adjustable visor, lifetime Warranty on Visor
- + Double D Ring chin strap (Fidlock available!)
- + Removable Integrated VEES device for full coverage eyeport protection
- + Vented, with vent plugs installed for cold weather use
- + Liner is soft microfiber, quick drying and comfortable
- + Arctic Chin curtain included, and removable

GOGGLES

FLOW

LENS VENTING TECHNOLOGY

The Lens venting and FLOW Fan provides an air exchange that reduces inner goggle humidity, and flows air up through the goggle and out.

FUZION

DUAL PANE FUSED INTO ONE

Our industry's first FUZION lens combines the inner and outer lenses of a traditional dual pane lens into a fused & bonded single pane ventless lens.

IGNITE⁵¹

HEATED LENS TECHNOLOGY

Simply push a button and the lightweight, strapmounted, rechargeable and smart lithium-ion power pack quickly heats the entire inner lens surface to 104°F.

The next evolution of the industry changing Sinister Goggle is here.

- + OTG, Over The Glasses, compatible

SION

+ 5MAG lens retention system

- + Improved tints, low light, and contrast improving technologies including polarized, HCS, and photochromatic also available

+ Hard lens frame insures an optimal fit, and a great sealing with 5MAG Lens Retention System

+ Soft goggle frame for unparalleled comfort and fit

+ Shuttered Venting in frame scoop air in or closes off flow

+ Easily replace lens for varying conditions

IGNITE S1

Terrain & Flow Meter

Overview

The next evolution of the industry changing Sinister Goggle is here. The Sinister X7 Ignite S1 Goggles will change the way you ride, packed with game changing 5MAG lens innovation and cylindrical anti-fog lens for quick and seamless lens change and unparalleled field of view. With Ignite S1 technology on this bestselling goggle, you get a wire-free lens that auto-heats as you ride for the ultimate in fog-eliminating performance. The augmented truss frame with gradient face foam lends to the optimal fit, comfort, and seal with your helmet. Frame shuttered venting, puts you in control of your goggles airflow from the cold frigid trails to the challenging mountains lines.

Features

- + Ignite heated inner lens - Durable PC outer lens with multiple coatings for premium clarity and performance - UV inhibitors, Hardness and anti-scratch, and Oleophobic coatings
- + 5MAG lens retention system
- + Soft goggle frame for unparalleled comfort and fit
- + Hard lens frame insures an optimal fit, and a great sealing with 5MAG Lens Retention System
- + OTG, Over The Glasses, compatible
- + Shuttered Venting in frame scoop air in or closes off flow
- + Easily replace lens for varying conditions
- + Removable outriggers
- + Improved tints, low light, and contrast improving technologies including polarized, HCS, and photochromatic also available

AVIATOR 2.0

AVIATOR 2.0 IGNITE S1 GOGGLE

Overview

The most Advanced Goggle in the Powersports market combined with our industry changing Ignite S1 heated Lens to eliminate fogging. While that might be enough, we did not stop there, we added a FLOW Fan in the goggle frame for additional air flow, and humidity control. S1 technology uses climate condition sensors to eliminate fog, but also maximize battery life. The most advance goggle chassis in the snowmobile market. The Toric shaped lens provides optimum shape for minimal distortion, optical clarity and maximum field of vision. The 5MAG Lens Retention System holds lenses securely to the goggle frame, and makes the lens change so easy you will change lens mid ride, in the field, to adapt to changing lighting and riding conditions.

Ignite S1 lens with 5Mag connection. For high exertion, high output, deep conditions. ITO heated lens technology combined with ANSI Z87.1 protective lens in an array of Tints and mirror, Transition, and polarized technology.

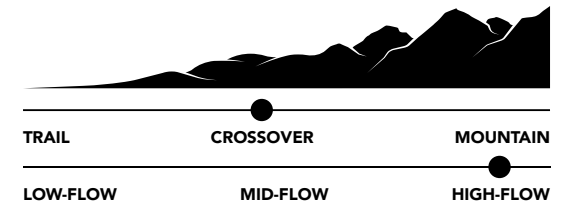

The Aviator 2.0 Ignite S1 goggle delivers with performance and innovation. New frame with integrated Flow fan, 5 Mag lens retention system, Ignite heated lens technology, and internal sensors embedded into frame to turn on fan and ignite lens when you need it, but save power when you dont. allows this goggle to stay fog free for up to 6 to 8 hours of riding time.

The first Toric shaped lens with 5mag lens retention system in the powersports segment. The Aviator 2.0 goggle uses at toric lens for optically clarity and low distortion. Toric is a larger radius in the longitude direction, and a smaller radius in the latitude direction, providing a softer radius and optimized clarity.

Applied Technologies

FLOW
IGNITE S1

Terrain & Flow Meter

Features

- + Ignite S1 toric lens, with cylindrical ITO lens for hours of fog free riding
- + 5MAG lens retention system, no wires from Ignite lens to frame. 5MAG system distributes power cleanly through magnet connection
- + Flow Fan - DC fan built into low profile fan compartment for high Flow, low power, and quiet air flow
- + S1 Ignite Battery Pack - 7.4 volt DC, with controls for auto, or manual modes, and battery level indicator. Battery replaceable.
- + Temp and humidity sensor controls the system to turn on when you need it, save power when fan and heat are not needed
- + APP controls give you more options including fan and ITO control, and real time data of goggle climate conditions
- + Soft goggle frame for unparalleled comfort and fit
- + Hard Lens frame for optimal fit and sealing, with 5MAG Lens retention system
- + OTG (Over The Glasses) compatible
- + FLOW venting in lens, and in frame
- + Easily replace lens on the trail for varying conditions
- + Integrated outriggers for perfect fit to 509 helmets and our perfect fit eyeport

Top Goggle Picks

- + Nightvision - Clear lens, maximum visibility for dark storm days, Tree riding.
- + Orange Pop - Fire Mirror lens uses our Light Rose HCS Tint for all conditions from blue bird powder days to storm days

AVIATOR 2.0

AVIATOR 2.0 GOGGLE

Terrain & Flow Meter

Overview

The Aviator 2.0 Goggle. The most advanced goggle chassis in the snowmobile market. The toric shaped lens provides optimum shape for minimal diptortion, optical clarity and maximum field of vision. The 5MAG Lens Retention System holds lenses securely to the goggle soft frame and making it incredibly easy to change your lens anytime for variable lighting and riding conditions.

Goggle and lens options are available to take on any terrain, in any condition, on any day. Various lenses from Clear and Mirror, High Contrast Spectrum Lenses, Polarized, and Photochromatic lens options. FUZION and FUZION FLOW lenses also available, and for extreme offtrail conditions the ignite lens is built with a new FLOW FAN. See below for more details.

The first Toric shaped lens with 5mag lens retention system in the powersports segment. The Aviator 2.0 goggle uses a toric lens for optically clarity and low distortion. Toric is a larger radius in the longitude direction, and a smaller radius in the latitude direction, providing a softer radius and optimized clarity.

Features

- + 5MAG lens retention system.
- + Soft goggle frame for unparralled comfort and fit
- + Hard lens frame insures an optimal fit, and a great sealing with 5MAG Lens Retention System
- + OTG (Over The Glasses) compatible
- + Flow venting in Lens, and in frame.
- + Easily replace lens on the trail for varying conditions.
- + Improved tints, low light, and contrast improving technologies including polarized, photochromatic also available

Applied Technologies

IGNITE

Terrain & Flow Meter

Overview

Using the Kingpin goggle platform with IGNITE™ heated lens technology for the ultimate package. The IGNITE™ heated lens provides the ultimate in fog prevention technology. Fueled by a lightweight strap mounted 7.4V 2200mAh rechargeable Lithium-ion power pack, the entire surface of the lens quickly heats up to 104°F using a transparent thermal conductive ITO (Indium Tin Oxide) layer on the inner lens. Evolved from military aircraft windshield defrosting technology, the Ignite quickly eliminates fog with a single button in either a two minute auto mode or 'always on' mode. A continuous run time rating of 4-5 full hours at max temp ensures you are fog free all day. Simply recharge the pack for tomorrow's ride.

Features

- + Ignite heated dual lens technology
- + Sonic welded, IP57 rated water & dust resistant power pack
- + Thermal conductive transparent ITO (Indium Tin Oxide) heated lens
- + Strap mounted rechargeable lightweight 7.4v, 2200mAh lithium-ion power pack
- + Lightweight rechargeable power pack & charging cable
- + Single button ignition: Auto 120 second mode & Always On mode
- + 104° F maximum heating temperature
- + 4-5 hour continuous max temp runtime
- + Audible & LED status indicators

Terrain & Flow Meter

Overview

Affordable and premium are two words that haven't existed together in the goggle market... until now. We went back to the R&D lab and designed a goggle with only premium materials that comes in at an affordable retail price point. Introducing the all new Kingpin snowmobile goggle from 509.

Quick-change lens technology. The Kingpin features a dual pane snow lens with premium anti-scratch technology. The inner lens was sourced from Italy and features the industry's best anti-fog coatings. The quick change lens technology makes quick work of a lens swap. Simply rotate the left & right mounts 90 degrees clockwise and remove the lens from the frame. It's that simple.

Features

- + Quick change lens technology
- + Dual pane snow lens
- + Premium anti-fog and anti scratch coatings
- + Contoured triple layer foam
- + Removable nose mask
- + Silicone lined premium strap

Pre-orders due March 1st!

Tired of packing multiple goggles? Try our innovative Photochromatic, auto darkening lenses. When exposed to UV sunlight the 509 Photochromatic lenses automatically darken the tint to adjust for bright conditions. The photochromatic technology is embedded on the inner pane of our dual lens allowing maximum reactivity in below freezing temperatures.

SUNNY

CLOUDY

ADJUSTING TINT

LENSES

We have worked with industry-leading anti-fog hard coatings to develop a proprietary, goggle specific, anti-fog technology. We tirelessly sourced the most durable, scratch resistant lens materials as well. The result is an innovative lens offered in a full range of weather-specific tints so you can adjust your view to any condition. Swapping tints is fast and easy with our quick-change technology.

TWO PRODUCTS DESIGNED TO WORK AS ONE AND TO BE SOLD AS ONE.

509 goggles and helmets were specifically designed to work together and function as one product. No longer are customers forced to mix one brand goggle with a different brand helmet. Mixing two different products that were never designed to work together will only lead to less than optimal results. This is where the 509 helmet & goggle combo come in. 509 goggles were specifically designed for a PERFECT FIT inside the 509 helmet. This perfect fit will lead to the absolute best user experience possible.

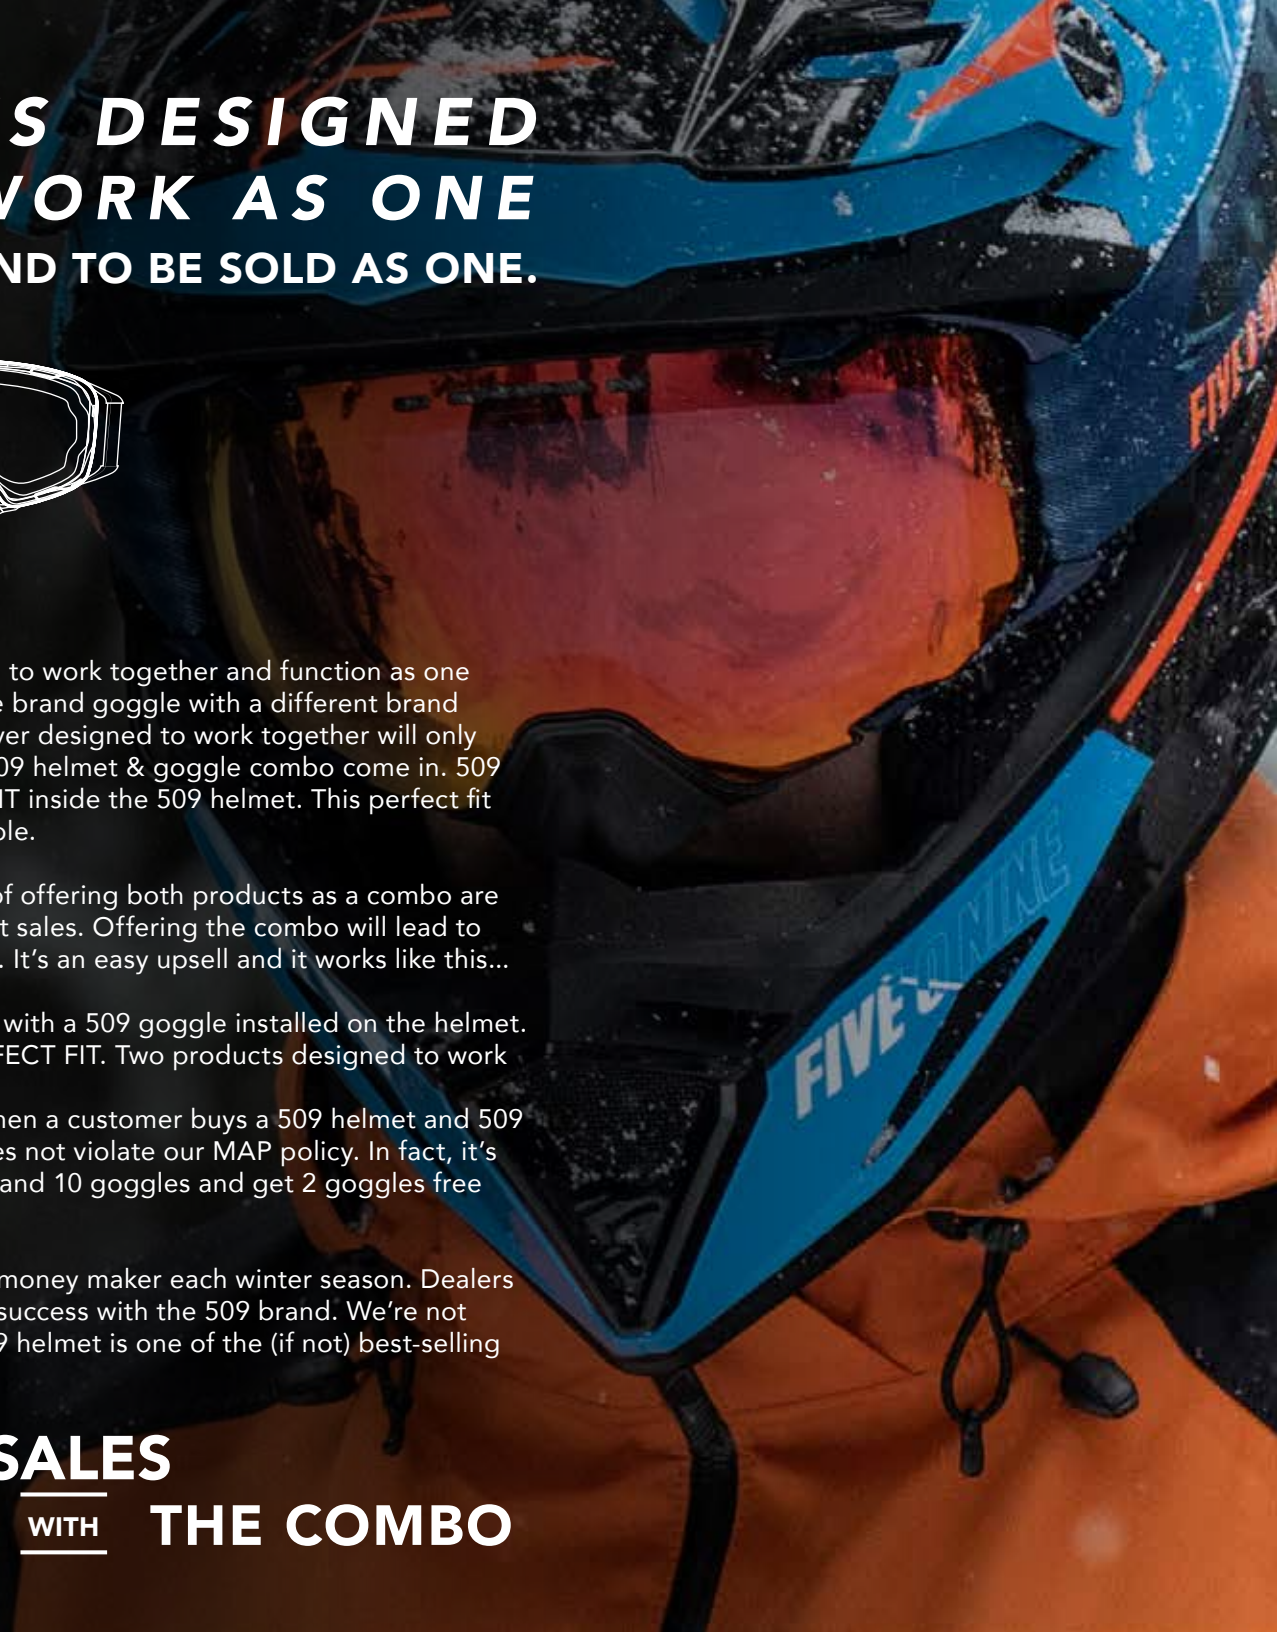

509 dealers who have adopted the selling practice of offering both products as a combo are experiencing SIGNIFICANTLY increased 509 product sales. Offering the combo will lead to increased 509 goggle and helmet sales, guaranteed. It's an easy upsell and it works like this...

Have an open box display helmet in your showroom with a 509 goggle installed on the helmet. Use this example for consumers to see the 509 PERFECT FIT. Two products designed to work as one.

Use the combo as an upsell: Offer a \$25 discount when a customer buys a 509 helmet and 509 goggle together. This discount ices the sale and does not violate our MAP policy. In fact, it's encouraged! Take advantage of our buy 10 helmets and 10 goggles and get 2 goggles free offer, to make back your margins.

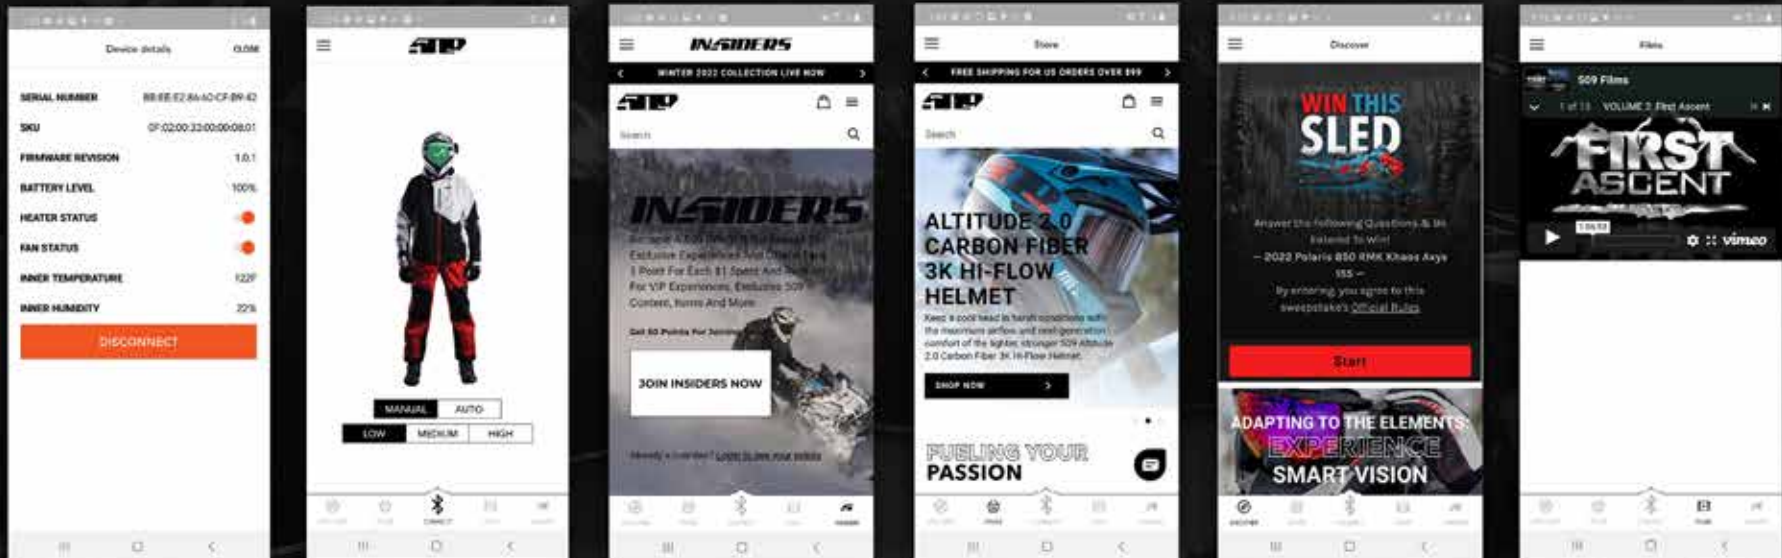

The 509 combo approach continues to be a proven money maker each winter season. Dealers who are taking full advantage of it are seeing great success with the 509 brand. We're not just a goggle company. A little-known fact is the 509 helmet is one of the (if not) best-selling helmet in the snowmobile market!

GROW YOUR SALES WITH THE COMBO

EXPERIENCE SMART GEAR

Adapt to the Elements and experience Smart Gear, head-to-toe. The Ride509 app allows wireless customization of heat profile settings for your environmental conditions, and more.

Equip yourself for winter

- + Connect and control your Ignite heated goggles

SYN DOWN IGNITE HEATED JACKET

Overview

The Synthetic Ignite Jacket is great to have on any snowmobile adventure. Comfortable around town and loading and unloading, and essential in the pack to be prepared for any unplanned overnights. Even the coldest days are no match for the heated Syn Down Ignite Jacket. 200 grams of synthetic down insulation and powered by your machine or a 509 12 Volt Power Pack (sold separately). Utilizing carbon heating elements, this heated technology is low profile, low bulk, and excellent at holding a perfect temperature to keep you warm, but not overheat. Use your 3-mode button to switch between low, medium, and high heat depending on your needs.

Features

- + Zippered hand pockets secure small items
- + DWR finish repels water without sacrificing breathability
- + Light and packable layer, don't leave home without it.
- + 200 grams intelligent insulation throughout
- + Ignite Heating Elements use low profile, low bulk carbon elements are excellent at passive heating
- + 3 button mode - low, medium, high settings
- + Connect to 12V power from machine using SAE 12-volt connector
- + 12 volt 3000 mAh battery used for off-machine heating

MEN'S BLACK

F04001700-XXX-001

Overview

As a diehard living for your next throttle fix, you require a lightweight jacket like the Syn Down. Made for everyday wear and a packable extra layer for snowmobiling, the 509 Syn Down Jacket has you covered from early morning rendezvous at the coffee shop, gassing up at the local non ethanol station, and riding till after dark. After riding, and loading up, this jacket stays on for drinks after. The fabric repels light precipitation and chilly gusts, and Syn Down insulation adapts to any activity to you throw at it.

Features

- + Zippered hand pockets secure small items
- + DWR finish repels water without sacrificing breathability
- + Light and packable layer for cool-to-cold weather
- + Syn Down intelligent 100 gram insulation for versatile warmth
- + Adjustable hem and stretch cuffs seal out elements

BALACLAVAS

LIGHTWEIGHT PRO

296 |

Overview

Designed to fit comfortably under your 509 helmet and goggles. These balaclavas are designed to keep you warm and comfortable no matter the conditions mother nature throws your way. Our lightweight stretchable polyester balaclava gives you a thin layer of cold weather protection that fits comfortably under your 509 helmet. Next up is our cold weather blocking midweight balaclava. This midweight provides premium cold weather protection. Featuring a longer cut for maximum protection, windproof technical materials up front, and breathable materials in key areas. For maximum cold weather protection, look no further than our heavyweight balaclava. This balaclava provides unmatched protection, featuring windproof material up front, longer cut, ventilation panels in key areas, and a moldable metal piece that you can form to the shape of your nose for a perfect fit.

Features LIGHTWEIGHT

- + Breathable, stretchable polyester
- + Sublimation graphics printing
- + Lightweight for basic cold weather protection

BLACK REFLECT

F09000701-XXX-004

Overview

We paid attention to fashion driven lines and features – adjustable hood, deep catch-all hand pockets, and an oversize chest pocket for all of today's gadgets and devices. Then we added a little something under the hood. This 3 layer 5TECH™ material with 4 way stretch has a woven face with DWR that repels rain and wind, an inner laminate layer further shuts down even the strongest winds and driving rain, and finished a soft micro fleece inside.

Features

- + 3 Layer 5TECH™ material with 4 way stretch, woven face, waterproof breathable and micro fiber fleece lining.
- + Over size chest pocket with internal stash pockets
- + Over size hand pockets
- + Draw cords on the hood
- + Extra length for full coverage

TECH ZIP HOODIE

320 |

Overview

One of the favorites and must haves in the 509 line up has been revised, improved, it might be hard to wear a normal sweatshirt after you've experienced the comfort and technical benefits of the 509 Tech Zip Hoodie. The high-performance Polyester hard face fleece fabric is water-resistant and resists shrinkage to maintain its fit and shape even after repeated washings. Zippered chest and hand pockets provide a secure spot to stash your keys, phone, and wallet.

Features

- + 5TECH™ with 10k/10k waterproof breathable materials, 300d Cordura® face, bartacked, and seam taped construction
- + 330 GSM 80% Polyester/20% cotton blend hard face fleece with embossed detail, knitted with a soft fleece inner surface for warmth, and the hard face knit to help cut wind and durability.
- + Chest, and lower hand warmer pockets with zippered closure for security.
- + Hood and Hem with elastic adjusters for a tuned fit

SUNGLASSES

SUNGLASSES

Overview

Our experience in making the industry's finest goggles allows us to make some pretty awesome sunglasses as well. Optics, performance, and style, combined with durability makes our 509 sunglasses the choice of passionate riders.

Polarized Sunglasses

Made of only the highest materials and crafted to the highest standards. Every one of our sunglasses feature a polarized Fusion 5 lens, a feature for glare cutting performance. Each sunglass is backed with a lifetime warranty and comes with a soft pouch.

Fit Guarantee

It's simple. If they don't fit you perfectly, you can send them back for a full refund or swap them out for another style. Just pay the return shipping (couple bucks) and we'll even reship your new pair for free!

TR90 Frames

TR90 was produced through Swiss technology as a thermoplastic material that is incredibly durable, flexible, and lightweight. Glasses made with TR90 are extremely comfortable because they have a flexible quality. Since they are flexible, they can bend under pressure and contour your face comfortably. This flexibility also makes TR90 glasses resilient to damage. Because the material is pliable, they are far less likely to break or bend from impact. If you're guilty of constantly dropping your glasses, fear not! TR90 frames are tougher than most. Finally, and most remarkable of all, TR90 glasses are lightweight! Even the boldest, biggest styles don't feel bulky when made with TR90. The thermoplastic material has a barely-there feel that you truly have to wear to believe.

Features

- + Polarized FUSION 5 lens
- + Lightweight
- + Antiscratch coating
- + Soft storage pouch
- + Lifetime warranty

A tactical-style backpack is shown from a top-down perspective. The backpack is primarily grey with black accents and features a large, dark 'F1' logo on the front. Red reflective stripes are visible along the edges and straps. The backpack is set against a dark, textured background. The word 'LUGGAGE' is overlaid in white, outlined text across the center of the image.

LUGGAGE

REVEL WHEELED GEAR DUFFEL BAG

358 |

Overview

The Revel Wheeled Duffel makes sure you are packed and loaded for your snowmobile Adventures. Built with specific compartments and organization for all of your key pieces of Riding Gear. Helmet Compartment that is soft lined. Boot compartment with compression molded lid stores boots, and keeps isolated from the rest of your gear. Large Main compartment for Outerwear, Protection, and all the extras. And a Unique Kickstand support along the side rails keeps the duffel standing up, but allows it to be easily stored or packed away when empty. Oversized Wheels and Telescoping Handle for easy rolling.

Allied uses our established 5TECH™ material, a Cordura® HP 300D face and 10k/10k membrane. The Allied boasts three sets of vents—inseam, outseam, and underarm—to let you feel the breeze when you're hucking or digging out. The Allied's also hooked up with more pockets than you have things to put in them—internal, chest, thigh, and hand—as well as an updated helmet-compatible hood. Burly Cordura® instep and lower-leg reinforcements fight off sharp running board attacks.

Features

- + 600 D Polyester Materials through out, with reinforcements, and bartacks in high stress areas for serious load carrying, and durability. PU coated to keep weather resistant
- + Kickstand support along side rails packs flat when not in use, but keeps it upright when full
- + Main compartment is oversized for all your gear, and more. #10 oversize coil zipper on main.
- + Fidlock equipped 1" quick release V-Buckle Compression straps to take stress off zippers, and keep load from shifting
- + Multiple grab handles
- + Boot compartment isolates boots from main compartment gear, with Mesh vent panels to help dry out when you forget to unload
- + Helmet compartment soft lined to keep your lid safe and protected, with mesh vent panels
- + Includes changing mat in zippered compartment
- + Extendable Luggage handle
- + Durable oversized 90 mm wheels, replaceable for the high mileage road warriors
- + Skid rails and skid plate on the bottom for reinforcement
- + Overall size when full: 31" x 16" x 15.5" , 110 Liter
- + ID card holder

REVEL DUFFEL BAG

Overview

The Revel Duffel bag is purpose built to organize your snowmobile riding gear. Large Oversize main compartment opening makes loading and finding gear easy. Helmet compartment with soft lining protects your helmet. Carry handles, and large oversize Carry strap with Shoulder pad for easy carry.

Features

- + 600d HD Weave with PU backer for weather resistance and durability
- + Bartacks at high stress handle attachments
- + Full terry loop construction for cushion, and insulation
- + Zippered helmet compartment with soft lining
- + Main compartment over sized for all your gear, #10 coil zipper
- + Side pocket for wires, chargers, maps
- + Removable Carry strap
- + ID card holder
- + Includes changing mat in zippered compartment
- + Size when full: 29" x 14" x 13", 80 Liter

MELEE TRAIL PACK

Overview

The Melee Trail Pack helps you be prepared and self contained for mountain adventures. Essentials are critical for you to be an asset out there, not a liability. Mechanical issues, first aid, avalanche preparedness, and survival situations can occur, best to be prepared. The Melee pack has a front shove-it pocket that allows you to carry a shovel or a quick stash for a jacket. Inner organization compartments are purpose built to carry a saw handle, probe, folding saw, goggles and lenses. Purpose built hydration compartment holds your favorite 2L to 3L bladder, and route your hydration hose to the shoulder strap. Unique shoulder strap suspension uses fast Fidlock buckles and pockets for essentials. The Melee Trail Pack will keep you prepared and hydrated all day long.

Features

- + Adjustable should strap suspension with integrated zipper pockets allow fast access to essentials like a phone, radio, or Spot device
- + Shoulder strap uses innovative Fidlock quick connect buckle for easy on and off, just like your 509 Helmet
- + Tool zippered pocket, main zippered pocket, and zippered hydration pocket. NOTE: hydration bladder not included.
- + Soft fleece lined pocket for quick access to sunglasses, or spare lenses.
- + Quick outer shove-it pocket, with adjusters to keep contents from bouncing
- + 600 D polyester woven materials, reinforced, and bartacked for durability
- + Padded Back panel with Vent channels keep the pack close, but vented.
- + 10 Liter volume keeps the pack small and purpose built for your essentials

ALIAS TRAVEL PACK

Overview

Alias Travel Pack from 509 is a backpack with Roll top closure, and organization for the modern adventurer that travels the world. A great pack for everyday carry for Work, Office, School, and traveling to the snowmobile cabin or far-off adventures. The main compartment has a quick access roll top built with plenty of storage. Large Laptop compartment protects, and organizes all your computer accessories. Two Detail organized compartments keeps your essentials in place. Small design details like pass through back panel, Sunglasses pocket, and Security pocket for concealed storage of Passport or your cash roll.

Features

- + 5TECH™ with 10k/10k waterproof breathable materials, 300d Cordura® face, bartacked, and seam taped construction
- + Comfortable and adjustable shoulder straps carry the load
- + Padded and vented back panel
- + Tension lock Hook keeps load under control
- + Laptop Compartment with padding, organizers, zippered for security and quick access.
- + 2 organizer pockets, for all the essentials - Go Pro accessories, Power pack for electronics charging, SD cards, Pens, Pencils, and business cards.
- + Laser cut Hypalon MOLLE for attachment of other gear
- + Side water bottle holder, zips away when not in use
- + Pass through Back Panel with hidden Security pocket
- + Soft Microfleece zippered pocket for sunglasses, readers, or Goggle Lenses
- + Size: 25 Liters

509 STEP UP PIT SHIRT

Designed and built by 509 with performance and features we require to spend all day wrenching, maintaining our rigs, or supporting our teams in the pits at events. Also a great shop and event shirt to meet and greet customers and inspire them with professional confidence. The Step Up shirt uses a lightweight and very breathable stretch woven material. Unique design styling, plastic snaps for easy on, easy off, and a zippered chest pocket. A small slot for a pen so you can record those lap times.

WARRANTY / RETURN POLICY

The 509 industry leading warranty covers every product we make in a variety of ways. As a dealer, we have setup a quick & easy process for you to handle 509 warranty claims. All warranty claims MUST be handled by 509 directly by calling 1-877-743-3509, emailing support@ride509.com, or creating a Warranty Support Ticket.

WARRANTY PROCESS:

1. Dealer or customer contacts 509 directly (877) 743-3509.
2. 509 diagnoses the issue over the phone or email. If the issue is covered under warranty, customer needs to email photo of the issue to support@ride509.com.
3. 509 will either require the defective item to be returned to 509 or we may issue a replacement part with no return required.

WARRANTY PERIODS:

30-DAY PRODUCT GUARANTEE

We guarantee our customers' 100% satisfaction and will work with our customers to ensure that satisfaction. In the event you, the customer, are not happy with your purchase, we will offer a different solution to rectify any issues, exchange the item for a more suitable replacement, or offer our 30-day money back guarantee. We have a very easy 30-day Return Policy. Submit a Customer Support Ticket to get a Return Authorization so we can process your customer's return or exchange.

509 OUTERWEAR WARRANTY

Outerwear and technical apparel items are covered by a 3 year limited Warranty against Materials and workmanship. Receipts or registration for warranty and for original purchaser only. Our warranty does not cover accidents or abuse (snags, tears, burns, etc), misuse (exposure to gas, oil, chemicals, burns, etc), improper care of the garment (UV exposure, storing wet), not following outerwear care and washing instructions, or normal wear and tear.

509 BOOT WARRANTY

All 509 boots and footwear are covered by a ONE year limited warranty against manufacturing defects, and material defects. BOA

system is covered by BOA and will repair for life of the product. See their site <https://store.theboasystem.com/warranty.php> for more details.

509 APPAREL WARRANTY

All 509 apparel items are covered by a ONE YEAR (from time of purchase) limited warranty against manufacturing defects within the lifespan of the product.

509 GOGGLE WARRANTY

All 509 goggles are covered by a LIFETIME warranty against manufacturing defects on all hardware (ie: frame, hinges, straps, nose masks, etc) within the lifespan of the product. There is a ONE YEAR warranty on the goggle foam and all lenses included with 509 goggles are covered under the standard 509 Lens Warranty.

509 HELMET WARRANTY

All 509 helmets are covered by a ONE YEAR (from time of purchase) warranty against manufacturing defects within the lifespan of the product.

The Delta R3 helmet shield is covered for 60 days.

509 LENS WARRANTY

All 509 lenses are covered by a ONE YEAR (from time of purchase) limited warranty against manufacturing defects within the lifespan of the product.

509 SUNGLASSES WARRANTY

All 509 sunglasses are covered by a LIFETIME (from time of purchase) limited warranty against manufacturing defects within the lifespan of the product.

509 UNIVERSAL CAMERA HELMET MOUNT WARRANTY

All 509 camera mounts are covered by a ONE YEAR (from time of purchase) limited warranty against manufacturing defects within the lifespan of the product.

509 VISOR WARRANTY

All 509 Visors (except for the Tactical Helmet visors) are covered by an industry leading LIFETIME warranty against all forms of damage within the lifespan of the product.

509 ELECTRONICS WARRANTY

All 509 heated shields, heated goggles, power packs, and fans are covered by 90 days limited warranty against manufacturing defects.

SERVICES

In situations where a customer's warranty period has expired, there are certain situations where replacement parts can be purchased or even circumstances where simple factory repairs are possible. To schedule any product service, call 1-877-743-3509 or email support@ride509.com or create a Support Ticket.

What is the 'lifetime' or 'lifespan' of a product? / The lifetime of a product has two definitions: the span of time that the item is safe to use (commonly referred to as its shelf life) and, secondly, the span of time that the product is in production and warrantied.

PURCHASES MUST BE REGISTERED TO QUALIFY FOR WARRANTY COVERAGE!

The end goal of the entire 509 warranty program is to make customers happy. While we highly prefer to handle all 509 warranty claims directly, we do understand there are special circumstances where you as a dealer, can provide direct warranty service in an effort to get your customers back on the snow immediately. These special circumstances, should first be approved by 509, whenever possible, and should always follow the above listed warranty periods. If your direct warranty service is used to make a customer satisfied in a time crunch situation, we will do everything within the scope of this warranty policy to back up your warranty decision.
